

# Where Every Pet Feels at Home

Allergy Control  
Odor Control  
Infection Control  
Congestion Control

Experience the Fear-free, Stress-free  
and Anxiety-free Atmosphere

All animals perceive and respond to their environment primarily through odours.

In veterinary clinics and hospitals, the mix of medical, chemical, and animal-related odours often becomes the root cause of fear, stress, and anxiety in pets. This not only affects their behaviour but can also complicate treatment and handling.
